

NORTH CAROLINA FACT SHEET

AAFP on Children's Health Insurance Program

The AAFP promotes and supports a safe and nurturing environment for all children that includes access to comprehensive medical, dental and mental health care, psychological and legal security and does not discriminate on the basis of adoption, foster care, religion, sexual orientation, or gender identity. Every family physician is trained to, and has provided, care for children. In 2016, more than 80% of family physicians reported providing care for adolescents, and 73% reported caring for infants and children. Close to one-third of family physicians also provide care for newborns and infants, and many deliver babies in their communities.¹ AAFP has a major stake in ensuring the viability of the Children's Health Insurance Program (CHIP) and Medicaid, which serves almost seven times as many poor and disabled children as CHIP. The AAFP urges Congress to enact a long-term funding extension of CHIP to keep both programs strong and foster stability to low income children and families.

North Carolina Family Medicine

- There are 3,864 AAFP members in North Carolina.²
- North Carolina has 14 family medicine residency programs.
- North Carolina has 111 medically underserved areas/populations.
- 4.3% of the residents in North Carolina live in a health professional shortage area.

Children's Health Insurance Program in North Carolina

- North Carolina operates a combination Children's Health Insurance Program called [NC Health Choice for Children](#).
- 1,391,358 children are covered by Medicaid and CHIP in North Carolina:
 - 256,446 children received CHIP-funded coverage
 - 1,134,912 received Medicaid-funded coverage³
- In 2015, there were 99,000 uninsured children in North Carolina.⁴
- CHIP in North Carolina covers children ages 0-18 from 138% - 211% of FPL.⁵
- Cost sharing is associated with CHIP in North Carolina; it begins at 133% of FPL.⁶
- North Carolina is expected to exhaust federal CHIP funds by December 2017 if Congress does not reauthorize the program.⁷

Medicaid/Medicare Parity

- The increase in Medicaid payment to 100% of Medicare for primary care services improved access to care among family physicians taking Medicaid by 7.7%.⁸
- AAFP's [Core Principles of Medicaid](#) supports payment for primary care services that are at least equal to Medicare's payment rate.
- Acceptance of new Medicaid patients among AAFP members is at an all-time high of 69%.
- North Carolina did not continue Medicaid/Medicare Parity after the program ended in December 2014. North Carolina Medicaid paid physicians only 79% of the Medicare payment for the same service in 2016.⁹

Teaching Health Centers

- The AAFP supports [teaching health centers](#) (THCs) reauthorization legislation, [HR 3394](#) and [S 1754](#), the *Training the Next Generation of Primary Care Doctors Act of 2017*, as a critical program to increase the number of primary care physicians.
- The Teaching Health Center Graduate Medical Education (THCGME) program also addresses the regional primary care physician shortage, particularly within rural and underserved communities.
- There is one teaching health center graduate medical education program in Hendersonville, NC and two teaching health center graduate medical education programs in Asheville, NC.
 - [Mountain Area Health Education Center, Inc.](#) has programs in family medicine and dental medicine in Asheville, NC and receives \$453,090 federal THCGME support for their family medicine residency. During the 2016-2017, there were 6 full-time equivalents.
 - [Mountain Area Health Education Center, Inc.](#) has a program in family medicine in Hendersonville, NC and receives \$238,245 in federal THCGME support. During the 2016-2017, there were 3 full-time equivalents.¹⁰
- Residents trained in THCs are well prepared for primary care practice in community settings, and data show that training in underserved communities increases the likelihood that these residents will choose to practice in similar settings upon graduation.¹¹ In addition, graduates of THCs are more likely to work in safety net clinics than residents who did not train in these centers.¹²

National Health Service Corps

- The AAFP advocates for the reauthorization of funding for the [National Health Service Corps](#) (NHSC) which is vital to promoting access to family physicians in health professions shortage areas throughout the nation.
- In North Carolina, the National Health Service Corps supports nearly 191 full-time clinicians.
 - Of those, 165 are in the NHSC loan repayment program.
 - 142 of the North Carolina NHSC placements are in primary health care.¹³
- The NHSC helps bring health care to those who need it most. Today, 10,400 NHSC members provide culturally competent care to more than 11 million people.¹⁴
