## The Familiar Physician

"As a concept, the *Familiar Physician* represents a model of mutual trust and shared decision-making that strengthens and supports the diagnostic and therapeutic process. ...

As a clinician... as a person... the *Familiar Physician* knows the patient well enough to identify a health issue better than a medical colleague who is unfamiliar with the person being treated."

## There has never been a better time to be a primary care doctor...

"Passion and inspiration can remain at the heart of health care in the future. As we move toward that future learn what you can do to help assure that the Familiar Physician, the basis for a strong physician-patient relationship, survives the coming storm".
