Note: Codes that include NOS (not otherwise specified) or unspec. (unspecified) have alternative diagnosis codes that are more specific. These alternatives can be found in or near the section of ICD-9-CM that deals with the relevant three-digit codes. The 100 codes that are preceded by an arrow (➤) have been identified by the authors as especially common in family medicine.

This list reflects changes that took effect Oct. 1, 2008. For more information about this year's ICD-9 changes, see "ICD-9 Codes: Time for the Annual Update," Hughes C. Family Practice Management. September/October 2008:A3-A5.
