

DON'T
SHUT THE DOOR
ON OUR
PATIENTS.

STOP THE UPCOMING MEDICARE PHYSICIAN PAY CUT.

Family physicians deliver the primary and preventive care seniors need to stay well and to better manage chronic conditions—the leading driver of health care spending. That’s the smart way to get a handle on Medicare spending.

Yet unless Congress acts by July 1, family physicians will get hit with a drastic pay cut. This will force many doctors to close their doors to new Medicare patients. Result: reduced primary care for seniors and unnecessary spending to treat health problems at more advanced stages.
