## **CDC** Coalition

November 11, 2022

The Honorable Rosa DeLauro Chair House Appropriations Committee Washington, DC 20515

The Honorable Patrick Leahy Chair Senate Appropriations Committee Washington, DC 20510 The Honorable Kay Granger Ranking Member House Appropriations Committee Washington, DC 20515

The Honorable Richard Shelby Vice Chair Senate Appropriations Committee Washington, DC 20510

Dear Chairwoman DeLauro, Chairman Leahy, Ranking Member Granger and Vice Chairman Shelby:

The undersigned 156 members of the CDC Coalition and other supporting state, national and academic organizations urge you to include at least **\$10.45 billion for the Centers for Disease Control and Prevention's programs in any final FY 2023 Labor, Health and Human Services, Education and Related Agencies appropriations bill.** While we believe our initial request of \$11 billion for CDC in FY 2023 is still needed, we urge you to support no less than \$10.45 billion. Strong funding for CDC is critical to supporting all of CDC's activities and programs, which are essential to protect the health of our communities. Due to years of underfunding, many CDC programs have not received the resources that are needed to address the many health challenges we face as a nation, resulting in many of CDC's most effective prevention programs not reaching all states and communities. We also believe that it is critical for Congress to quickly finalize the FY 2023 appropriations process to avoid lengthy continuing resolutions that bring uncertainty and make it more difficult for the agency and its grantees to protect the public's health.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation's public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to ensure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators, academic institutions, patients and individuals and families served by CDC programs.

CDC serves as the command center for the nation's public health defense system against emerging and reemerging infectious diseases as well as man-made and natural disasters. From playing a leading role in aiding in the surveillance, detection and mitigation of the COVID-19 pandemic in the U.S. and globally, to monitoring and investigating the current monkeypox outbreak and other disease outbreaks in the U.S. and internationally, to pandemic flu preparedness, CDC is the nation's – and a global – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and international partners rely on CDC for accurate information, direction and resources to ensure they can prepare, respond and recover from a crisis or disease outbreak. While CDC is playing a leading role in protecting the public's health from COVID-19, it is faced with many other unprecedented challenges and responsibilities ranging from chronic disease prevention to combating the opioid, tobacco, e-cigarette and obesity epidemics to emergency preparedness. CDC funds programs for strengthening public health infrastructure at all levels; strengthening and expanding the public health workforce; injury prevention; research into gun violence prevention; suicide prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease, stroke, cancer, lung disease and other chronic diseases; tobacco prevention and control; nutrition and physical activity; immunizations; HIV, STI and hepatitis prevention; prevention of vector-borne diseases; environmental health, including the prevention of childhood lead poisoning and addressing the health impacts of climate change; oral health; reducing health disparities; preventing maternal and infant mortality and birth defects; sickle cell disease data collection; preventing antimicrobial resistance; preventing prescription drug overdose; improving the health and quality of life of individuals with disabilities; Alzheimer's disease prevention and awareness; vision and eye health, public health research and health statistics and harmonizing clinical laboratory test results. It is notable that more than 70% of CDC's budget supports public health and prevention activities through state and local health organizations and agencies, national public health partners and academic institutions.

In addition to ensuring a strong public health infrastructure and protecting our communities from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency's programs remain woefully underfunded. We urge you to include at least \$10.45 billion for CDC's programs in any final FY 2023 Labor, Health and Human Services, Education and Related Agencies appropriations bill.

Please contact Don Hoppert at <u>donald.hoppert@apha.org</u> or 202-777-2514 with any questions regarding our request.

Sincerely,
