

# MORE FOR YOUR MONEY

## WHERE HEALTH IS PRIMARY.

 **Health is  
Primary**

BROUGHT TO YOU BY AMERICA'S FAMILY PHYSICIANS

The United States spends twice that of other developed countries on our health care system, yet our health ranks near the bottom. How can we stop spending so much and getting so little?

Research shows that for every dollar invested in primary care, we can save \$13 in downstream costs to the system. Patients who have a primary care doctor spend 30 percent less on health care than patients who don't and they are less likely to suffer from cancer, heart disease or stroke. States with a high number of primary care doctors have lower health care costs and higher quality care.

We know that a strong foundation of primary care can deliver better care and better health at lower costs to the system. Let's #MakeHealthPrimary in America.
