

# Frontline of Family Medicine

September 26, 2019

# Meet our Panel

# Today's Goals

- Engage directly with family physicians as they share their insights on what's really happening at the point of care.
- Hear firsthand what's working, what's not, and where physicians see gaps & needs in education, tools, and resources.

# Questions

- Due to the changing landscape of healthcare today, what education or training do you think could be incorporated into medical school and residency that would better equip family physicians for practice?
- What post-graduate educational changes would you like to see made to help increase family physician's confidence in
  - OB skills
  - Virtual care (telehealth)
  - Engaging with patients using digital/technology tools
  - Navigating the administrative side
  - Other areas

# Questions

- What new resources would make your life easier in caring for patients?
- What format of resources are easiest and most effective for your learning? For educating your patients?
- What are your views of using technology in your practice?

# Questions

- What are the most challenging health conditions you face and why?
- What are your suggestions for reducing healthcare costs?
- What do you find to be the most efficient ways to stay up-to-date in rapidly changing areas such as technology, guidelines, therapeutic indications, etc.
