

PENNSYLVANIA FACT SHEET

AAFP on Children's Health Insurance Program

The AAFP promotes and supports a safe and nurturing environment for all children that includes access to comprehensive medical, dental and mental health care, psychological and legal security and does not discriminate on the basis of adoption, foster care, religion, sexual orientation, or gender identity. Every family physician is trained to, and has provided, care for children. In 2016, more than 80% of family physicians reported providing care for adolescents, and 73% reported caring for infants and children. Close to one-third of family physicians also provide care for newborns and infants, and many deliver babies in their communities.¹ AAFP has a major stake in ensuring the viability of the Children's Health Insurance Program (CHIP) and Medicaid, which serves almost seven times as many poor and disabled children as CHIP. The AAFP urges Congress to enact a long-term funding extension of CHIP to keep both programs strong and foster stability to low income children and families.

Pennsylvania Family Medicine

- There are 5,730 AAFP members in Pennsylvania.²
- Pennsylvania has 32 family medicine residency programs.
- Pennsylvania has 156 medically underserved areas/populations.
- 1.7% of the residents in Pennsylvania live in a health professional shortage area.

Children's Health Insurance Program in Pennsylvania

- Pennsylvania operates a separate [Children's Health Insurance Program](#).
- 1,567,184 children are covered by Medicaid and CHIP in Pennsylvania:
 - 342,268 children received CHIP-funded coverage
 - 1,224,916 received Medicaid-funded coverage³
- In 2015, there were 111,000 uninsured children in Pennsylvania.⁴
- CHIP in Pennsylvania covers children ages 0-18 from 134% - 314% of FPL.⁵
- Cost sharing is associated with CHIP in Pennsylvania; it begins at 208% of FPL.⁶
- Pennsylvania is expected to exhaust federal CHIP funds by February 2018, if Congress does not reauthorize the program.⁷

Medicaid/Medicare Parity

- The increase in Medicaid payment to 100% of Medicare for primary care services improved access to care among family physicians taking Medicaid by 7.7%.⁸
- AAFP's [Core Principles of Medicaid](#) supports payment for primary care services that are at least equal to Medicare's payment rate.
- Acceptance of new Medicaid patients among AAFP members is at an all-time high of 69%.
- Pennsylvania did not continue Medicaid/Medicare Parity after the program ended in December 2014. Pennsylvania Medicaid paid physicians only 51% of the Medicare payment for the same service in 2016.⁹

Teaching Health Centers

- The AAFP supports [teaching health centers](#) (THCs) reauthorization legislation, [HR 3394](#) and [S 1754](#), the *Training the Next Generation of Primary Care Doctors Act of 2017*, as a critical program to increase the number of primary care physicians.
- The Teaching Health Center Graduate Medical Education (THCGME) program also addresses the regional primary care physician shortage, particularly within rural and underserved communities.
- There is one teaching health center graduate medical education program in Scranton, PA and one teaching health center graduate medical education program in Greensboro, PA.
 - [Cornerstone Care, Inc.](#) has a program in family medicine and received \$735,157 in federal THCGME support. During 2016-2017, there were 9 full-time equivalents.
 - [The Wright Center for Graduate Medical Education](#) has a program in family and internal medicine and received \$9,335,871 in federal THCGME support. During 2016-2017, there were 118 full-time equivalents.¹⁰
- Residents trained in THCs are well prepared for primary care practice in community settings, and data show that training in underserved communities increases the likelihood that these residents will choose to practice in similar settings upon graduation.¹¹ In addition, graduates of THCs are more likely to work in safety net clinics than residents who did not train in these centers.¹²

National Health Service Corps

- The AAFP advocates for the reauthorization of funding for the [National Health Service Corps](#) (NHSC) which is vital to promoting access to family physicians in health professions shortage areas throughout the nation.
- In Pennsylvania, the National Health Service Corps supports nearly 178 full-time clinicians.
 - Of those, 161 are in the NHSC loan repayment program.
 - 88 of the Pennsylvania NHSC placements are in primary health care.¹³
- The NHSC helps bring health care to those who need it most. Today, 10,400 NHSC members provide culturally competent care to more than 11 million people.¹⁴
