Ask your Senator to Support Increases to Medicaid Payment

Medicaid programs provide critical care to our most vulnerable populations, including pregnant women and children. The COVID-19 pandemic has only underscored the importance of this coverage as workers are laid off and turn to Medicaid for care needs for themselves and their children. Unfortunately, many physicians are unable to accept new Medicaid patients because Medicaid only pays a fraction of the rates paid by Medicare and private payers. The Ensuring Access to Primary Care for Women and Children Act (S. 4088) would alleviate barriers to care for vulnerable patients by applying the Medicare payment rate floor to Medicaid primary care services and ensure our most vulnerable have access to the care they deserve. Ask your Senator to cosponsor this critical legislation today!
