The Honorable Mark Kelly
U.S. Senate
Washington, D.C. 20510

Dear Senators Cassidy, Shaheen, Scott and Kelly:

On behalf of the American Academy of Family Physicians (AAFP), which represents 133,500 family physicians and medical students across the country, I write to thank you for introducing the Primary Care Enhancement Act of 2021 (S.128).

The AAFP supports direct primary care (DPC) and sees it as a model of care that provides a pathway to continuous, comprehensive and coordinated primary care for patients. However, there are identified barriers that may prevent some patients from realizing the full potential of the DPC model.

One of those barriers is the prohibition on the permissible use of health savings accounts (HSAs) funds to pay for participation in a DPC practice. Under existing interpretation of the Internal Revenue Code, patients with HSAs are prohibited from engaging in DPC arrangements with a family physician or other primary care clinician. Your legislation would remove these current legal barriers that prevent patients with HSAs from receiving care from family physicians practicing in a DPC model.

A growing number of family physicians are choosing to practice in the DPC model and patient demand for DPC practices is growing. Additionally, employers and labor unions are driving growth in the model, further necessitating changes in law that allow patients to benefit from this emerging primary care delivery model. The AAFP is eager to work with you to pass this legislation, thus allowing our members practicing in a DPC model the opportunity to engage with more individuals and provide a longitudinal primary care home to their patients.

We applaud your leadership on this important issue, and we are pleased to support S.128. For questions, please contact Erica Cischke, Senior Manager, Legislative and Regulatory Affairs at ecischke@aafp.org.

Sincerely,
June 12, 2021
