The following 67 national organizations supported the below bipartisan letter urging the highest possible funding in Fiscal Year 2023 for federal programs at HRSA, CDC, and NIH to improve maternal health and eliminate inequities in maternal health outcomes. The letter was co-led by Rep. Diana DeGette (D-CO) and Rep. Mike Gallagher (R-WI).

For a copy of the final letter and the full list of Members of Congress who co-signed the letter, please reach out to Alyson Northrup with the Association of Maternal & Child Health Programs (AMCHP) at anorthrup@amchp.org.

National Organizations in Support of FY23 DeGette/Gallagher Maternal Health Approps

Dear Colleague Letter:

Academy of Nutrition and Dietetics
African American Mayors Association
AIDS Alliance for Women, Infants, Children, Youth & Families
Alliance for Black NICU Families
American Academy of Family Physicians
American Academy of Pediatrics
American College of Clinical Pharmacy
American College of Obstetricians and Gynecologists
American College of Physicians
American Medical Association
American Nurses Association
American Psychological Association
American Public Health Association
APS Foundation of America, Inc
Association for Prevention Teaching and Research
Association of Maternal & Child Health Programs
Association of Public Health Laboratories
Association of State Public Health Nutritionists
Black Mamas Matter Alliance
Centering Healthcare Institute
Child First
Children's Environmental Health Network
Community Catalyst
Every Mother Counts
Families USA
Family Voices
First Focus Campaign for Children
Futures Without Violence
Hand to Hold
HealthConnect One
Healthy Birth Day, Inc.
Healthy Teen Network
HealthyWomen
Johnson & Johnson
Lamaze International
March for Moms
March of Dimes
Maternal Mental Health Leadership Alliance
Medela
Mom Congress
National Association for Children's Behavioral Health
National Association of Chronic Disease Directors
National Association of Councils on Developmental Disabilities
National Association of Nurse Practitioners in Women’s Health
National Blood Clot Alliance
National Institute for Children's Health Quality - NICHQ
National Network of Public Health Institutes
National Nurse-Led Care Consortium
National Rural Health Association
National WIC Association
Nurse-Family Partnership
Organization of Teratology Information Specialists
Parents as Teachers
PCOS Challenge: The National Polycystic Ovary Syndrome Association
Physicians for Reproductive Health
Postpartum Support International
Prevent Blindness
Prevention Institute
RESULTS
Saint Luke’s Health System
Society for Maternal-Fetal Medicine
Society for Reproductive Investigation
The 2 Degrees Foundation
The Joint Commission
The Shane Foundation
U.S. Breastfeeding Committee

----- LETTER TEXT NEXT PAGE-----
Dear Chair Murray and Ranking Member Blunt:

Our nation continues to face a crisis in maternal health. As you develop the appropriations legislation for Fiscal Year 2023, we encourage you to prioritize the highest possible funding level for the below programs that seek to prevent maternal deaths, eliminate inequities in maternal health outcomes, and improve maternal health.

More women die from pregnancy-related complications in the United States than in any other developed country, and the rate of maternal deaths continues to rise. According to the Centers for Disease Control and Prevention (CDC), approximately 700 pregnancy-related deaths occur in the U.S. each year and 60 percent of these deaths are preventable. Major disparities in maternal mortality exist, with Black women three to four times more likely than non-Hispanic white women to die due to pregnancy-related complications and Indigenous women more than twice as likely than non-Hispanic white women to die due to pregnancy-related complications. The latest data from CDC show a marked increase in maternal deaths during the first year of the pandemic. Moreover, for every maternal death that occurs, more than 70 other women suffer severe complications of pregnancy or childbirth.

**Title V Maternal and Child Health (MCH) Services Block Grant** – The Title V MCH Services Block Grant administered by the Health Resources and Services Administration (HRSA) is the only federal program of its kind devoted solely to improving the health of all women and children in the United States. This flexible and cost-effective funding source is used by states, territories, and other jurisdictions to address their most critical maternal and child health needs. This includes supporting statewide maternal mortality reviews - the gold standard in maternal mortality surveillance - and implementing strategies to translate recommendations made by maternal mortality review committees to meaningful action. Title V also supports the Alliance for Innovation on Maternal Health program, a data-driven maternal safety and quality improvement initiative, State Maternal Health Innovation Grants, a demonstration program to implement evidence-based interventions to address critical gaps in maternity care service, and the new Maternal Mental Health Hotline.

**Healthy Start** – HRSA's Healthy Start program provides grants to support community-based strategies to improve perinatal outcomes for women and children in communities throughout the nation. In particular, the Healthy Start program seeks to reduce disparities in infant and maternal mortality by empowering women and
their families to identify and access maternal and infant health services in their communities. To further support healthy maternal outcomes, since FY 2019, Healthy Start programs across the nation have had health care providers on-site to provide clinical services, such as well-woman care and maternity care services, making the Healthy Start program a critical component of federal efforts to reduce both maternal and infant mortality.

**Safe Motherhood and Infant Health** – This portfolio of programs at CDC supports a broad range of activities that seek to improve the health of moms and babies and reduce disparities in maternal and infant health outcomes. This includes implementation of the Preventing Maternal Deaths Act (P.L. 115-344) through the Enhancing Reviews and Surveillance to Eliminate Maternal Mortality (ERASE MM) Program to provide funding, technical assistance, and guidance to state maternal mortality review committees. It also includes support for perinatal quality collaboratives, which are state or multi-state networks of teams working to improve the quality of care for mothers and babies. Among other activities, Safe Motherhood supports CDC’s HEAR HER Campaign, a communication campaign to increase awareness of warnings signs that could lead to pregnancy-related death or delivery complications and strengthen patient and provider communication.

**National Institutes of Health** – Research is critically important to optimizing the health of women and their families in the United States and identifying the causes behind pregnancy-related deaths and complications. The vast majority of research in pregnancy in the U.S. occurs at the National Institutes of Health (NIH). Broadly, 20 of 27 institutes at the NIH support at least one grant or project related to pregnancy-related research, with the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) consistently providing the greatest support of perinatal research in the United States. NICHD’s work includes the Maternal-Fetal Medicine Units Network (MFMU), a network of 12 centers across the country that conduct clinical studies to improve maternal, fetal, and neonatal health. NICHD is also working to advance safe and effective therapies for pregnant and lactating women as recommended in 2019 by the federal Task Force on Research Specific to Pregnant Women and Lactating Women (authorized under P.L. 114-255). NICHD funding also supports research to address gaps in our understanding of the best way to support pregnant and postpartum women with a substance use disorder.

Provided strong and sustained funding for each of these programs is critical to addressing a maternal health crisis in the U.S. that has only worsened during the pandemic. Thank you for your consideration of this request to prioritize the highest possible funding level for programs that seek to prevent maternal deaths, eliminate inequities in maternal health outcomes, and improve maternal health.

Sincerely,
