

2019 Agenda for the Reference Committee on Health of the Public and Science

National Conference of Constituency Leaders — Sheraton Kansas City Hotel at Crown Center

<u>Item No.</u>	<u>Resolution Title</u>
1. Resolution No. 3001	Person-first Language in AAFP Materials
2. Resolution No. 3002	Improving Access to Care for Homebound Patients
3. Resolution No. 3003	Front of Label Packaging to Improve Diet Choices among those with Low Health Literacy
4. Resolution No. 3004	Abolish Corporal Punishment in Schools
5. Resolution No. 3005	Family Medicine's Role in Addressing and Preventing Sexual Harassment
6. Resolution No. 3006	Eliminate Race-Based Medicine
7. Resolution No. 3007	Public Policies to Reduce Sugary Drink Consumption in Children and Adolescents
8. Resolution No. 3008	Gender Affirming Medical Care for Youth in Family Medicine
9. Resolution No. 3009	Implicit Bias Revision
10. Resolution No. 3010	Addressing "Stealthling" as a Form of Sexual Assault
11. Resolution No. 3011	Increase Food Equity in the United States
12. Resolution No. 3012	Gender-neutral Language in AAFP Publications
13. Resolution No. 3013	Sexual Orientation and Gender Identity Data Collection in Electronic Health Records
14. Resolution No. 3014	AAFP to Oppose Legislation of Physician-Patient Decision Making in Child and Adolescent Gender-Affirming Care
15. Resolution No. 3015	Oppose Racism

1 **Resolution NO. 3001**

2
3 **Person-first Language in AAFP Materials**

4
5 Submitted by: Lauren Williams, MD, General Registrant
6 Kara Mayes, MD, New Physicians
7

8 WHEREAS, Popular terminology often uses disease status as an adjective or noun such as
9 "smoker", "addict", "obese person", which implies that these are unchanging characteristics
10 rather than modifiable disease states, and

11
12 WHEREAS, it is now standard of practice to use medically accurate, person-first language to
13 refer to individuals with chronic disease states and doing so is outlined in rules of American
14 Psychological Association style, and

15
16 WHEREAS, current American Academy of Family Physicians policy titled, "Obesity and
17 Overweight," states, "Family physicians should counsel all patients on nutrition, physical activity,
18 and behavioral strategies to prevent inappropriate weight gain and obesity. Family physicians
19 should screen all adult patients for obesity and offer intensive counseling and behavioral
20 interventions to promote sustained weight loss for obese adults. (Intense counseling involves
21 more than one session per month for at least 3 months). Overweight and obesity are defined as
22 the Centers for Disease Control and Prevention (CDC) defines them. Reasonable and
23 necessary diagnosis and treatment should be paid by all third party payers," and

24
25 WHEREAS, in 2013 the American Medical Association adopted a policy which recognizes
26 obesity as a complex, chronic disease that requires medical attention, and

27
28 WHEREAS, the American Association of Clinical Endocrinologists has a policy statement
29 categorizing obesity as a chronic disease, and

30
31 WHEREAS, the Obesity Action Coalition and partner medical organizations including American
32 Society for Metabolic and Bariatric Surgery, The Obesity Society, Obesity Medicine Association,
33 Academy of Nutrition and Dietetics, American Academy of Orthopaedic Surgeons, World
34 Obesity Federation, and College of Contemporary Health support people-first language for
35 obesity, now, therefore, be it

36
37 RESOLVED, That the American Academy of Family Physicians update its policy titled, "Obesity
38 and Overweight," to incorporate person-first language: stating "adults with obesity" rather than
39 "obese adults" and recognizing obesity as a complex, chronic disease that requires medical
40 attention, and be it further

41
42 RESOLVED, That the American Academy of Family Physicians revise content on
43 familydoctor.org to ensure person-first language in all of its educational materials, and remove
44 any current language that uses a disease state as a descriptor for a specific individual, for
45 example, using "a person who has obesity," instead of "a patient who is obese", and be it further

46
47 RESOLVED, That National Conference of Constituency Leaders bring a resolution forward to
48 the American Academy of Family Physicians Congress of Delegates asking that the American
49 Academy of Family Physicians adopt a policy of consistent use of person-first language for all
50 disease states, recognizing that patients should not be defined by their disease state.

1 **Resolution NO. 3002**

2
3 **Improving Access to Care for Homebound Patients**

4
5 Submitted by: Anna Doubeni, MD, MPH, Women
6 Kristin Mack, DO, Women
7

8 WHEREAS, Homebound patients are patients for whom it is a significant hardship to leave their
9 home without assistance based on functional impairment from physical or mental health
10 disability, and

11
12 WHEREAS, close to two million Medicare beneficiaries living in the United States are
13 completely or mostly homebound. An estimated two million more have difficulty accessing care
14 outside the home, and four million Medicare patients are potentially underserved, and

15
16 WHEREAS, there are patients of all ages that would benefit from home based care and have
17 unique needs through the continuum of their lives, and

18
19 WHEREAS, homebound patients are likely to under-access preventive care and chronic
20 disease management impacting health outcomes and resulting in high-cost care delivered in
21 hospitals and emergency departments, and

22
23 WHEREAS, functional impairment represents a risk factor for re-admissions and mortality and
24 homebound patients represent a population with complex physical and social needs, and

25
26 WHEREAS, independent telemedicine firms and payer-based care programs provide a conduit
27 but does not provide a therapeutic alliance between a primary care physician and a patient
28 which leads to fragmented care, and

29
30 WHEREAS, the delivery of care in the home to homebound patients requires a team-based
31 approach with an intense focus on care management. and

32
33 WHEREAS, family medicine physicians are uniquely qualified to provide and coordinate care
34 and advocacy for homebound patients across the continuum of life with a multigenerational
35 approach, and

36
37 WHEREAS, there are financial obstacles to physicians providing this care, but use of advanced
38 practitioners with more limited scope of practice in these roles often leads to further referrals
39 that may not be necessary or desired by the patient, now, therefore, be it

40
41 RESOLVED, That the American Academy of Family Physicians recognize the lack of access to
42 care for homebound patients and the role of the family medicine physician in providing these
43 services, and be it further

44
45 RESOLVED, That the American Academy of Family Physicians research and support training
46 family medicine physicians in team-based delivery of care in the home setting, and be it further

47
48 RESOLVED, That the American Academy of Family Physicians support current opportunities for
49 family medicine physicians providing these services, and be it further
50

51 RESOLVED, That the American Academy of Family Physicians advocate for legislation and
52 parity in compensation for physician delivery of primary care in the home setting.

1 **Resolution NO. 3003**

2
3 **Front of Label Packaging to Improve Diet Choices among those with Low Health Literacy**

4
5 Submitted by: Harshini Jayasuriya, MD, General Registrant
6 Meisha Waleh, MD, General Registrant
7 Johan Hernandez, MD, International Medical Graduates
8 Meisha Shields, MD, Women
9 Maria Colon-Gonzalez, MD, FAAFP, Minority
10 Nichole Johnson, MD, LGBT
11 Erika Roshanravan, MD, General Registrant
12 Juliann Barrett, DO, Women
13 Joseph Freund, MD, LGBT
14

15 WHEREAS, Cardiovascular disease and Type 2 diabetes are the diseases affecting the
16 greatest number of Americans, that are also most strongly associated with diet, and
17

18 WHEREAS, given that two-thirds of the United States (U.S.) adult population and one-third of
19 children and adolescents are overweight or obese, chronic disease levels are high, and a
20 healthy diet consistent with the Dietary Guidelines for Americans is essential for all Americans,
21 and
22

23 WHEREAS, U.S. Congress directed the Centers for Disease Control and Prevention and the
24 Institute of Medicine to examine and provide recommendations regarding front-of-package
25 nutrition rating systems and symbols in 2010, and
26

27 WHEREAS, studies support the goal and purposes of front-of-package systems announced by
28 the Food and Drug Administration in April 2010 and concludes that the most useful primary
29 purpose of front-of-package rating systems and symbols would be to help consumers identify
30 and select foods based on the nutrients most strongly linked to public health concerns for
31 Americans, now, therefore, be it
32

33 RESOLVED, That the American Academy of Family Physicians offer updated conclusions
34 based on current research on diet and nutrition as it relates to obesity and cardiovascular
35 disease (leading cause of death among adults in the United States), and be it further
36

37 RESOLVED, That the American Academy of Family Physicians support single, standardized
38 front-of-package labeling, regulated by the Food and Drug Administration, specifically geared
39 toward obesity, cerebrovascular accident, and diabetes in a simple, health literate manner.

1 **Resolution NO. 3004**

2
3 **Abolish Corporal Punishment in Schools**

4
5 Submitted by: Nicole Shields, MD, Women
6 Marie-Elizabeth Ramas, MD, Minority
7 Juilann Barrett, MD, Women
8

9 WHEREAS, The American Academy of Family Physicians' (AAFP) Corporal Punishment in
10 Schools policy states that it is opposed to corporal punishment in schools, and

11
12 WHEREAS, the AAFP policy defines corporal punishment in schools as the purposeful infliction
13 of bodily pain or discomfort by an official in the educational system upon a student as a penalty
14 for disapproved behavior, and

15
16 WHEREAS, the AAFP policy states that evidence indicates that corporal punishment is not as
17 effective as other means of behavior management and may make behavior worse, and positive
18 reinforcement has been shown to be more effective and long-lived than aversive reinforcement,
19 and

20
21 WHEREAS, the AAFP supports alternative methods of behavior management and modification
22 in the school environment which enhances a student's optimal learning, and

23
24 WHEREAS, corporal punishment is still legal at public schools in 19 states (Alabama, Arkansas,
25 Arizona, Colorado, Florida, Georgia, Idaho, Indiana, Kansas, Kentucky, Louisiana, Missouri,
26 Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Wyoming) and
27 is also allowed at private schools in 48 states, and

28
29 WHEREAS, the American Academy of Pediatrics supports the need for adults to avoid physical
30 punishment and verbal abuse of children and recommended the abolishment of corporal
31 punishment in schools, now, therefore, be it

32
33 RESOLVED, That the American Academy of Family Physicians strengthen its statement on
34 Corporal Punishment in Schools to recommend the abolishment of corporal punishment in
35 schools, and be it further

36
37 RESOLVED, That the American Academy of Family Physicians develop free creative resources
38 and supportive tools for chapters to advocative locally against corporal punishment in schools,
39 and be it further

40
41 RESOLVED, That the American Academy of Family Physicians collaborate with the American
42 Academy of Pediatrics for the abolishment of corporal punishment in schools in the 19 states
43 where corporal punishment is legal.

1 **Resolution NO. 3005**

2
3 **Family Medicine's Role in Addressing and Preventing Sexual Harassment**

4
5 Submitted by: Tabatha Wells, MD, FAAFP, New Physicians
6 Tessa Rohrberg, MD, New Physicians
7 Margaret Smith, MD, Minority
8 Carrie Pierce, MD, Women
9 Scott Hartman, MD, FAAFP, General Registrant

10
11 WHEREAS, The American Academy of Family Physicians (AAFP) Board adopted an anti-
12 harassment policy in January 2019, and

13
14 WHEREAS, these are just a few source postings on AAFP's website that address sexual
15 harassment, and

16
17 WHEREAS, our responsibility as educators and patient advocates is no different on this topic
18 than it is for any other disease state or public health concern, and

19
20 WHEREAS, our mission as family physicians is to improve the health of patients, families, and
21 communities by serving the needs of members with professionalism and creativity, and

22
23 WHEREAS, as a nation, we must come to terms with the epic pervasiveness of sexual
24 harassment, and

25
26 WHEREAS, the AAFP has been a leader on other issues of epic proportion that have impacted
27 the health and well-being of our communities (AIDS, measles, etc.), and

28
29 WHEREAS, the following are examples of dated resources from AAFP that demonstrate how a
30 comprehensive approach (awareness campaign) can be captured on any topic: Depression and
31 Mental Health Compilation of policies, clinical recommendations, journals, and patient
32 resources, Ask and Act Tobacco Cessation Campaign Compilation of resources (both internal
33 and external) and ways to get involved, now, therefore, be it

34
35 RESOLVED, That the American Academy of Family Physicians develop a comprehensive
36 initiative to raise awareness of family medicine's role in addressing and preventing sexual
37 harassment, both member-facing and public-facing.

1 **Resolution NO. 3006**

2
3 **Eliminate Race-Based Medicine**

4
5 Submitted by: Lauren Williams, MD, General Registrant
6 Daniel Neghassi, MD, Minority
7 Lisetta Shah, MD, Minority
8 Adegbemisola Daniyan, MD, General Registrant
9 Alexandra Zaballa, MD, General Registrant
10 Zia Okocha, MD, General Registrant
11 Nicole Chaisson, MD, Women
12 Ivonne McLean, MD, General Registrant
13

14 WHEREAS, Race is a social construct and there is no underlying genetic or biological factor
15 that unites people within the same racial category, and
16

17 WHEREAS, race is poorly-defined, changing over time and dependent on country (e.g. an
18 individual can be classified as both White in Brazil and Black in the USA), and
19

20 WHEREAS, while genetic ancestry can be used to assess genetic predisposition for disease,
21 people who belong to the same racial category do not necessarily share the same genetic
22 ancestry and
23

24 WHEREAS, unlike genetic ancestry, racial categories are broad, poorly-defined and not
25 scientific, and racial health disparities cannot be ascribed to innate biological differences, and
26

27 WHEREAS, medical calculations exist that use race as a variable, as if it were a biologic
28 marker, such as in widely-used calculations of glomerular filtration rate, pulmonary function,
29 post-partum hemorrhage risk, success of trial of labor after Cesarean, and determination of
30 atherosclerotic cardiovascular disease risk, and these calculations may not accurately reflect
31 the patient's true health status, and
32

33 WHEREAS, race is a social category, thus when race is used as a risk factor for disease, that
34 risk is a reflection of how society treats people of different races, not of any underlying genetic
35 predisposition, and often the only characteristic shared by people of the same race is the lived
36 experience of being treated as a member of that racial category, and
37

38 WHEREAS, the Kidney Disease Improving Global Outcomes 2012 practice guideline for
39 evaluation and management of CKD has recommended discontinuing use of the MDRD study
40 equation in favor of a more accurate serum-marker based equation that does not rely on race as
41 a surrogate, and
42

43 WHEREAS, the coefficient used may underestimate CKD in black patients, especially young
44 patients, which in turn may systematically cause high-risk black patients to miss time-sensitive
45 interventions, and
46

47 WHEREAS, there is value in understanding how racism and systemic oppression result in racial
48 health disparities, and
49

50 WHEREAS, one of the AAFP's key strategic objectives is to "take a leadership role in
51 addressing diversity and social determinants of health as they impact individuals, families, and
52 communities across the lifespan and to strive for health equity." now, therefore be it

53

54 RESOLVED, That the American Academy of Family Physicians adopt a policy that speaks
55 against the use of race as a proxy for biology or genetics in management guidelines, and that
56 identifies race as a social construct, and be it further

57

58 RESOLVED, That the American Academy of Family Physicians support members in critically
59 evaluating their use of race in research and clinical practice, including development of materials
60 to educate its members regarding how to interpret estimated glomerular filtration rate within the
61 context of the patient and without emphasis on the race coefficient, and be it further

62

63 RESOLVED, That the American Academy of Family Physicians support research to investigate
64 indicators alternative to race to stratify medical risk factors for disease states, including
65 advocating for research into new estimated glomerular filtration rate equations that don't use
66 race as a proxy for muscle mass, and be it further

67

68 RESOLVED, That the American Academy of Family Physicians advocate for estimated
69 glomerular filtration rate to be reported without regard to race by liaising with other medical
70 associations (including the American Society of Nephrology).

1 **Resolution NO. 3007**

2
3 **Public Policies to Reduce Sugary Drink Consumption in Children and Adolescents**

4
5 Submitted by: Kevin Bernstein, MD, MMS, FAAFP, General Registrant
6 Wesley Eichorn, DO, New Physicians
7 Alan-Michael Vargas, MD, FAAFP, IMG
8 Wanda Gumbs, MD, MPH, Minority
9 Benjamin Silverberg, MD, MSc, FAAFP, LGBT
10 Sarah Ledger, DO, Women
11 Rosalie Cassidy, MD, General Registrant
12 Jessica Richmond, MD, FAAFP, New Physicians
13 Alex Mroszczyk-McDonald, MD, New Physicians
14

15 WHEREAS, The consumption of sugary drinks is directly linked to increasing rates of childhood
16 obesity within the United States at record levels, and
17

18 WHEREAS, childhood obesity continues into adulthood resulting in significant co-morbidities
19 and early mortality, and
20

21 WHEREAS, the American Academy of Pediatrics and American Heart Association recently
22 published and endorsed its 2019 Public Policies to Reduce Sugary Drink Consumption in
23 Children and Adolescents to include supporting the following public policy recommendations:
24

- 25 1. Local, state, and/or national policies intended to reduce consumption of added sugars
26 should include the consideration of approaches that increase the price of sugary drinks,
27 such as an excise tax. Such taxes should be accompanied by education of all
28 stakeholders on the rationale and benefits of the tax before implementation. Tax
29 revenues should be allocated, at least in part, to reducing health and socioeconomic
30 disparities.
- 31 2. Federal and state governments should support efforts to decrease sugary drink
32 marketing to children and adolescents.
- 33 3. Federal nutrition assistance programs should aim to ensure access to healthful food and
34 beverages and discourage consumption of sugary drinks.
- 35 4. Children, adolescents, and their families should have ready access to credible nutrition
36 information, including on nutrition labels, restaurant menus, and advertisements.
- 37 5. Policies that make healthy beverages the default should be widely adopted and followed.
- 38 6. Hospitals should serve as a model and implement policies to limit or disincentivize
39 purchase of sugary drinks, and
40

41 WHEREAS, the American Academy of Family Physicians is the premier primary care physician
42 organization that has significant impact as an advocate for public health, now, therefore, be it
43

44 RESOLVED, That the American Academy of Family Physicians develop a policy statement that
45 mirrors the American Academy of Pediatrics 2019 Policy Statement: "Public Policies to Reduce
46 Sugary Drink Consumption in Children and Adolescents", and be it further
47

48 RESOLVED, That the American Academy of Family Physicians join the American Academy of
49 Pediatrics (AAP) and the American Heart Association in its support of the AAP 2019 Policy
50 Statement: "Public Policies to Reduce Sugary Drink Consumption in Children and Adolescents."

1 **Resolution NO. 3008**

2

3 **Gender Affirming Medical Care for Youth in Family Medicine**

4

5 Submitted by: Jean Lu, MD, Minority
6 Melissa Hidde, MD, LGBT
7 James Conniff, MD, MPH, New Physicians
8 Juan Carlos Venis, MD, MPH, LGBT
9 Jessica Heselschwerdt, MD, LGBT

10

11 WHEREAS, Gender affirming medical treatments are associated with improved health
12 outcomes among transgender youth, now, therefore, be it

13

14 RESOLVED, That the American Academy of Family Physicians support gender-affirming
15 medical care for children and adolescents including puberty suppression and hormonal
16 treatment as part of the scope of family medicine.

1 **Resolution NO. 3009**

2
3 **Implicit Bias Revision**

4
5 Submitted by: Fayza Sohail, MD, Minority
6 Loretta Duggan, MD, Minority
7 Bernard Richard, MD, Minority
8 Jorge Galdamez, MD, General Registrant
9 Dakeya Jordan, DO, Women
10 Keasha Guerrier, MD, General Registrant

11
12 WHEREAS, In 2018 the American Academy of Family Physicians adopted the definition of
13 implicit bias which can result in poor experiences for clinicians, patients and other member of
14 the health care team, and

15
16 WHEREAS, established attitudes and behaviors brought into patient encounters can adversely
17 affect treatment and adherence, and

18
19 WHEREAS, implicit bias can result in different outcomes for various sub-populations, now,
20 therefore, be it

21
22 RESOLVED, That the American Academy of Family Physicians make available a toolkit to allow
23 for implicit bias education for all members of the healthcare delivery team, and be it further

24
25 RESOLVED, That the American Academy of Family Physicians address implicit bias training
26 through various means such as continuing medical education, performance improvement
27 activity, problem-based learning sessions, and other activities, and be it further

28
29 RESOLVED, That the American Academy of Family Physicians coordinate with the
30 Accreditation Council for Graduate Medical Education efforts to create a curriculum and toolkit
31 for implicit bias training, and report findings back to the 2020 National Conference of
32 Constituency Leaders.

1 **Resolution NO. 3010**

2
3 **Addressing "Stealthling" as a Form of Sexual Assault**

4
5 Submitted by: Anita Ravi, MD, New Physicians
6 Rupal Bhingradia, MD, General Registrant
7 Kyle Speakman, MD, New Physicians
8 Tessa Rohrberg, MD, New Physicians
9 Tabatha Wells, MD, New Physicians
10 Margaret Smith, MD, Minority
11 Laura Kaplan-Weismann, MD, LGBT
12 Nicole Chaisson, MD, MPH, Women
13 Tessa Lang, MD, New Physicians
14

15 WHEREAS, Stealthling is a term that refers to non-consensual condom removal during sexual
16 intercourse, and

17
18 WHEREAS, stealthling exposes victims to physical risks of pregnancy, disease, and emotional
19 consequences, and

20
21 WHEREAS, the American Academy of Family Physicians (AAFP) has existing policy endorsing
22 effective ways to prevent sexually transmitted infections, including the use of "condoms (or other
23 effective devices such as dental dams) in a suitable manner for the entire episode of sexual
24 activity," and

25
26 WHEREAS, family physicians likely see many patients affected by non-consensual condom
27 removal, however, good quality statistics of prevalence of this issue in the United States do not
28 exist, and

29
30 WHEREAS, one health center in Melbourne Australia found that 32% of women and 19% of
31 men who have sex with men (MSM) patients reported experiencing stealthling, and

32
33 WHEREAS, there is no existing policy in the United States that recognizes 'stealthling' as a form
34 of sexual assault, and

35
36 WHEREAS, the American College of Obstetricians (ACOG) included in its committee opinion
37 from the Committee on Health Care for Underserved Women in 2013 the importance of
38 screening, educating and counseling patients on the effect of reproduction and sexual coercion,
39 and

40
41 WHEREAS, representatives Ro Khanna (CA) and Carolyn Maloney (NY) sent a letter to
42 Attorney General William Barr on February 22, 2019 requesting clarity regarding how the
43 Department of Justice addresses the act of nonconsensual condom removal, and

44
45 WHEREAS, ACOG defines sexual assault as a crime of violence and aggression and
46 encompasses a continuum of sexual activity that ranges from sexual coercion to contact abuse
47 (unwanted kissing, touching, or fondling) to rape, now, therefore, be it

48
49 RESOLVED, That the American Academy of Family Physicians develop a policy defining sexual
50 assault, and be it further
51

52 RESOLVED, That the American Academy of Family Physicians include non-consensual
53 condom removal (stealthing) as a form of sexual assault, and be it further
54 RESOLVED, That the American Academy of Family Physicians provide patient education on
55 non-consensual condom removal as a form of sexual assault, including but not limited to
56 FamilyDoctor.org, and be it further
57
58 RESOLVED, That the American Academy of Family Physicians support legislative efforts that
59 include non-consensual condom removal (stealthing) as a form of sexual assault, and be it
60 further
61
62 RESOLVED, That the NCCL Delegates present a resolution on non-consensual condom
63 removal at the 2019 AAFP Congress.

1 **Resolution NO. 3011**

2

3 **Increase Food Equity in the United States**

4

5 Submitted by: Robn Anderson, MD, Women
6 Zita Maggiore, MD, Women

7

8 WHEREAS, Over 33% of the population in the United States live more than one mile from a
9 grocery store and do not own a car, in both urban and rural settings, and

10

11 WHEREAS, living in an area that has increased access to high calorie, low nutritional content
12 food (fast food, junk food) has been shown to lead to increased rates of obesity, and

13

14 WHEREAS, programs that have improved access to healthy foods have been shown to lower
15 rates of obesity, and

16

17 WHEREAS, recipients of Supplemental Nutrition Assistance Program (SNAP) funds can use
18 these funds for high-calorie, low-nutritional content foods, now, therefore, be it

19

20 RESOLVED, That the American Academy of Family Physicians create a toolkit to help members
21 advocate to address food deserts and food swamps in their community, and be it further

22

23 RESOLVED, That the American Academy of Family Physicians lobby for restricting the use of
24 Supplemental Nutrition Assistance Program (SNAP) funds so that junk foods and high-caloric
25 foods cannot be purchased using these funds.

1 **Resolution NO. 3012**

2
3 **Gender-neutral Language in AAFP Publications**

4
5 Submitted by: Jessica Heselschwerdt, MD, LGBT
6 Juan Carlos Venis, MD, LGBT
7 Melissa Hidde, MD, LGBT
8 Chelsea Unruh, MD, LGBT
9 Tabatha Wells, MD, New Physicians

10
11 WHEREAS, The estimated prevalence of transgender persons is 0.3-0.5% and non-binary
12 individuals make up 25-35% or more of transgender populations, and

13
14 WHEREAS, many, if not most transgender men retain reproductive organs and the capacity to
15 become pregnant, and

16
17 WHEREAS, many, if not most transgender women retain reproductive organs such as the
18 prostate regardless of their decision to pursue gender affirming surgeries, and

19
20 WHEREAS, there are well described rationale for using gender neutral language in patient care
21 and using language that is inclusive of all gender identities can reduce victimization and
22 discrimination, and

23
24 WHEREAS, the Joint Commission recommends using neutral and inclusive language in
25 interviews and when talking with all patients, now, therefore, be it

26
27 RESOLVED, That the American Academy of Family Physicians existing and future publications
28 (eg. online, print) be reviewed and updated to use gender-neutral language, including those
29 regarding sexual and reproductive health topics or other topics that have traditionally been
30 gendered, and be it further

31
32 RESOLVED, That all American Academy of Family Physicians (AAFP) produced and AAFP-
33 supported patient education materials use gender-neutral language, including those regarding
34 sexual and reproductive health or other topics that have traditionally been gendered, and be it
35 further

36
37 RESOLVED, That the American Academy of Family Physicians (AAFP) advocate for use of
38 gender-neutral language in patient-oriented materials to third-party purveyors of patient
39 education materials used by AAFP members in their practice.

1 **Resolution NO. 3013**

2
3 **Sexual Orientation and Gender Identity Data Collection in Electronic Health Records**

4
5 Submitted by: Juan Carlos Venis, MD, LGBT
6 Jessica Heselschwerdt, MD, LGBT
7 Daniel Harris, MD, New Physicians
8 Jessica Hidde, MD, LGBT
9

10 WHEREAS, LGBTQ+ patients have unique health needs and experience health disparities, and

11
12 WHEREAS, Sexual Orientation and Gender Identity (SOGI) data collection helps clinicians
13 provide safe, high quality, and equitable patient care, and

14
15 WHEREAS, chosen name use is linked to reduced depressive symptoms, suicidal ideation, and
16 suicidal behavior among transgender youth, and

17
18 WHEREAS, the Institute of Medicine and the Joint Commission recommend collection of SOGI
19 data in the electronic medical record, and

20
21 WHEREAS, the World Professional Association for Transgender Health has published
22 recommendations for modernizing electronic health records to include health information
23 necessary for equitable care of gender minority persons, now, therefore, be it

24
25 RESOLVED, That the American Academy of Family Physicians advocate to commercial
26 electronic health record developers and vendors to include Sexual Orientation and Gender
27 Identity fields, name used, pronouns used, and anatomy inventories, as required features, and
28 be it further

29
30 RESOLVED, That the American Academy of Family Physicians advocate for hospital and other
31 health care entities to enable Sexual Orientation and Gender Identity fields, name used,
32 pronouns used, and anatomy inventories in their electronic health record, and provide adequate
33 training to their staff on best practices for this data collection.

1 **Resolution NO. 3014**

2
3 **AAFP to Oppose Legislation of Physician-Patient Decision Making in Child and**
4 **Adolescent Gender-Affirming Care**

5
6 Submitted by: Nichole Johnson, MD, LGBT
7 Brent Sugimoto, MD, LGBT
8 Marissa Lapedis, MD, LGBT
9 Nicole Chaisson, MD, Women
10 Jewell Carr, MD, New Physicians
11 Syed Naseeruddin, MD, Minority
12 Cynthia Jeremiah, MD, IMG
13

14 WHEREAS, Living in a body that does not match your gender identity causes emotional and
15 mental stress and can lead to societal stigma, poor mental health outcomes, and suicide, and
16

17 WHEREAS, research shows that regardless of developmental stage, prepubertal children who
18 assert a transgender identity know their gender as clearly and consistently as their
19 developmentally equivalent peers and benefit from the same level of validation and social, and
20

21 WHEREAS, American Academy of Pediatrics supports policies that are gender-affirming for
22 children, and
23

24 WHEREAS, medical decision-making should solely occur between a patient and physician, and
25

26 WHEREAS, legislation should not play a role in medical decision-making, particularly in the
27 nuanced and sensitive topic of gender identity, now, therefore, be it
28

29 RESOLVED, That the American Academy of Family Physicians have a position statement that
30 supports gender-affirming care of children and adolescents, and be it further
31

32 RESOLVED, That the American American of Family Physicians affirms that gender-affirming
33 care should occur solely between the physician and patient and patient's guardian, and be it
34 further
35

36 RESOLVED, That the American Academy of Family Physicians oppose any legislation
37 regarding medical decision-making in gender-affirming care for children and adolescents.

1 **Resolution NO. 3015**

2
3 **Oppose Racism**

4
5 Submitted by: Natalie Hinchcliffe, DO, General Registrant
6 Nichole Johnson, MD, LGBT
7 Roma Amin, MD, Minority
8 Nichole Rajesh, MD, IMG
9 Amelia Frank, MD, Women
10 Tabetha Wells, MD, New Physicians
11 Richard Bruno, MD, General Registrant
12 Laura Kaplan-Weisman, MD, LGBT
13 Jewell Carr, MD, New Physicians
14

15 WHEREAS, Race is a social construct and that construct has a myriad negative effects on
16 personal health, including harming the physician-patient relationship and poor health outcomes,
17 and
18

19 WHEREAS, racism - structural, explicit and implicit - contributes to health disparities in the
20 United States, over and above the role of socioeconomic status, and
21

22 WHEREAS, existing American Academy of Family Physicians (AAFP) anti-discrimination policy
23 mentions race, but AAFP has no explicit anti-racism policy and has not taken a vocal stance
24 against racism (e.g., failing to speak out against recently revealed racist medical school
25 yearbook photos), and
26

27 WHEREAS, the Liaison Committee on Medical Education and Accreditation Council for
28 Graduate Medical Education have cultural competence and anti-discrimination policies that fail
29 to mention race, thereby denying people's lived experience of racism, and
30

31 WHEREAS, family physicians have a moral, ethical and professional imperative to identify
32 racism in our profession, in our communities, and in ourselves, now, therefore, be it
33

34 RESOLVED, That the American Academy of Family Physicians adopt an anti-racism policy, and
35 be it further
36

37 RESOLVED, That the American Academy of Family Physicians ask that the Liaison Committee
38 on Medical Education add race to its existing "Cultural Competence and Health Care
39 Disparities" section 7.6 of their Functions and Structure of a Medical School Standards for
40 Accreditation of Medical Education Programs Leading to the MD Degree, and be it further
41

42 RESOLVED, That the American Academy of Family Physicians take an active stance against
43 racism when racist events occur in the medical community, and be it further
44

45 RESOLVED, That the American Academy of Family Physicians encourage its members and
46 require its officeholders to participate in training in racism and implicit bias, and be it further
47

48 RESOLVED, That the American Academy of Family Physicians encourage its members to
49 identify structural racism in their work setting.
