

# 2019 Consent Calendar for the Reference Committee on Practice Enhancement

---

National Conference of Constituency Leaders — Sheraton Kansas City Hotel at Crown Center

1 **The Reference Committee on Practice Enhancement has considered each of the items**  
2 **referred to it and submits the following report. The committee’s recommendations on each**  
3 **item will be submitted as a consent calendar and voted on in one vote. An item or items**  
4 **may be extracted for debate.**

5  
6 **RECOMMENDATION: The Reference Committee on Practice Enhancement recommends the**  
7 **following consent calendar for adoption:**

8  
9 **Item 1:** Adopt Substitute Resolution No. 5001: “Family Medicine Surgical and Non-surgical  
10 Obstetrical Privileges”.

11  
12 **Item 2:** Adopt Substitute Resolution No. 5002: “Support Training and Patient/physician  
13 Reimbursement of Lifestyle Medicine”.

14  
15 **Item 3:** Adopt Resolution No. 5003: “Education on Anal Cancer Screening”.

16  
17 **Item 4:** Not Adopt Resolution No. 5004: “Physician Wellness as a Quality Metric”.

18  
19 **Item 5:** Not Adopt Resolution No. 5005: “State Parity in Telehealth and Telemedicine”.

20  
21 **Item 6:** Not adopt Resolution No. 5006: “Pay us for Quality Measures that We Have Control Over”.

22  
23 **Item 7:** Not Adopt Resolution No. 5007: “Non-Physician Provider Resource Utilization”.

24  
25 **Item 8:** Reaffirm Resolution No. 5008: “Opposition of Restrictive Covenants”.

26  
27 **Item 9:** Adopt Resolution No. 5009: “AAFP Policy on Physician Assistants”.

28  
29 **Item 10:** Adopt Substitute Resolution No. 5010: “Education for Completion of Disability  
30 Certifications”.

31  
32 **Item 11:** Adopt Resolution No. 5011: “Preceptor Expansion Through Financial Incentives”.

33  
34 **Item 12:** Adopt Resolution No. 5012: “Prevention of HIV Acquisition”.

35  
36 **Item 13:** Adopt Resolution No. 5013 “Required Residency Training for Pre-exposure and Post  
37 Exposure HIV Treatment”.

38  
39 **Item 14:** Adopt Substitute Resolution No. 5014: “Developing Point of Care Ultrasound Education  
40 and Resources for Practicing Family Physicians”.

# 2019 Report of the Reference Committee on Practice Enhancement

National Conference of Constituency Leaders — Sheraton Kansas City Hotel at Crown Center

1 The Reference Committee on Practice Enhancement has considered each of the items  
2 referred to it and submits the following report. The committee's recommendations on each  
3 item will be submitted as a consent calendar and voted on in one vote. Any item or items  
4 may be extracted for debate.

5  
6 **ITEM NO. 1: RESOLUTION NO. 5001: FAMILY MEDICINE SURGICAL AND NON-SURGICAL**  
7 **OBSTETRICAL PRIVILEGES**

8  
9 RESOLVED, That the American Academy of Family Physicians (AAFP) and chapters of the  
10 AAFP around the country embark on advocacy programs to educate hospital systems and  
11 administrators that family physicians should be granted privileges to practice operative and  
12 non-operative Obstetrics with similar criteria set forth for other physicians that are allowed  
13 to practice similar services, and be it further

14  
15 RESOLVED, That the American Academy of Family Physicians recommend that all  
16 hospitals should have clear criteria for granting privileges to physicians who perform  
17 operative and non-operative Obstetrics regardless of their specialty training, and be it  
18 further

19  
20 RESOLVED, That the American Academy of Family Physicians setup a committee that will  
21 study what should be done in response to denied privileges to practice operative and or  
22 non-operative Obstetrics based on no other reason than not completing residency in  
23 obstetrics and gynecology.

24  
25 Testimony heard was in favor of the resolution. Members discussed not being able to obtain  
26 obstetric privileges even when family physicians have years of experience. Members further  
27 testified of the importance to protect full spectrum primary care. The reference committee  
28 acknowledged the positive comments but felt the first resolved clause was beyond the scope of the  
29 AAFP. The reference committee reaffirmed the second resolved clause because of the current  
30 AAFP and American College of Obstetrics and Gynecology (ACOG) joint statement. The third  
31 resolved clause was substitute adopted because the reference committee wanted it to be more  
32 inclusive.

33  
34 **RECOMMENDATION: The reference committee recommends that Substitute Resolution No.**  
35 **5001, which reads as follows, be adopted in lieu of Resolution No. 5001:**  
36

37 **RESOLVED, That the American Academy of Family Physicians setup a committee**  
38 **that will study current barriers preventing family physicians from obtaining**  
39 **privileges to practice operative and/or non-operative Obstetrics.**  
40

41 **ITEM NO. 2: RESOLUTION NO. 5002: SUPPORT TRAINING AND PATIENT/PHYSICIAN**  
42 **REIMBURSEMENT OF LIFESTYLE MEDICINE**  
43

44 RESOLVED, That the American Academy of Family Physicians support policy changes by  
45 medical certification bodies requiring education that contains principles of lifestyle medicine  
46 and the 15 core competencies as developed by the American College of Lifestyle Medicine  
47 and American College of Preventive Medicine, and be it further  
48

49 RESOLVED, That the American Academy of Family Physicians support legislation and  
50 regulatory policies incentivizing active patient participation in lifestyle changes and  
51 physician reimbursement for such initiatives, with encouragement of supporting actions by  
52 third-party payors for reimbursement mechanisms, and be it further  
53

54 RESOLVED, That the American Academy of Family Physicians support legislation that  
55 encourages adoption of lifestyle medicine principles, such as tax or policy incentives that  
56 promote healthy activities and grants for lifestyle-medicine related education or training  
57 guidelines.  
58

59 There were several members speaking in support of the resolution. Those testifying in support  
60 pointed to the importance of lifestyle changes in preventing chronic disease, the lack of sufficient  
61 training in lifestyle medicine in residencies, and the poor reimbursement for counseling patients in  
62 lifestyle changes. Physicians need literacy in lifestyle medicine so they can effectively counsel their  
63 patients. The reference committee discussed the wording of the first resolved clause and felt the  
64 wording was not clear as to which specific medical certification bodies should be requiring  
65 education or what type of education they should be requiring. The AAFP is not able to control or  
66 dictate educational content to the certification bodies. The reference committee discussed the  
67 second resolved clause and chose to recommend a substitute because it addressed three different  
68 issues and for reasons of clarity, acknowledging it is difficult to ask insurance companies to pay for  
69 lifestyle changes. New payment models already offer incentives to promote healthy lifestyles in  
70 patients. In discussion of the third resolved clause the reference committee agreed the AAFP  
71 should support any legislation that encourages adoption of lifestyle medicine changes.  
72

73 **RECOMMENDATION: The reference committee recommends that Substitute Resolution No.**  
74 **5002, which reads as follows, be adopted in lieu of Resolution No. 5002:**  
75

76 **RESOLVED, That the American Academy of Family Physicians support legislation**  
77 **and regulatory policies that incentivize active patient participation in evidence-based**  
78 **lifestyle changes, and be it further**  
79

80 **RESOLVED, That the American Academy of Family Physicians support physician**  
81 **reimbursement for providing lifestyle medicine initiatives.**  
82

83 **ITEM NO. 3: RESOLUTION NO. 5003: EDUCATION ON ANAL CANCER SCREENING**  
84

85 RESOLVED, That the American Academy of Family Physicians make available adequate  
86 educational opportunities for members to develop the skills and knowledge required for anal  
87 cancer screening and appropriate follow-up testing including high resolution anoscopy  
88 (HRA), and be it further

89  
90 RESOLVED, That the American Academy of Family Physicians develop clinical practice  
91 guidelines regarding screening for anal cancer, including high risk populations.  
92

93 Six members testified in favor of the resolution. Members noted the inconsistencies in guidelines  
94 and the lack of consensus on how to screen patients. Members stated these inconsistencies create  
95 patient distrust of physicians. The reference committee agreed with member testimony and was in  
96 favor of adopting the resolution.  
97

98 **RECOMMENDATION: The reference committee recommends that Resolution No. 5003 be**  
99 **adopted.**

100  
101 **ITEM NO. 4: RESOLUTION NO. 5004: PHYSICIAN WELLNESS AS A QUALITY METRIC**  
102

103 RESOLVED, That the American Academy of Family Physicians work with Centers for  
104 Medicare and Medicaid Services and other appropriate organizations/insurers with the goal  
105 to improve patient safety, reduce cost of care by improving the wellness of physicians,  
106 particularly within large groups or employed settings, and be it further  
107

108 RESOLVED, That the American Academy of Family Physicians work to make physician  
109 wellness an objective quality measure for health care systems and group practices and tie  
110 this to reimbursement (e.g. physician wellness to hospital reimbursements and Centers for  
111 Medicare and Medicaid Services Medicare Star Rating), as well as making this information  
112 publicly available.  
113

114 The reference committee only heard testimony in support of the resolution. Testimony highlighted  
115 the importance of physician wellness in quality and safety of patient care. Physician wellness is a  
116 system issue and tying wellness to payment to hospital systems would encourage hospitals to take  
117 the issue seriously and implement an action plan. The AAFP has fully supported physician  
118 wellness as part of the Quadruple Aim and implementing a performance measure would be  
119 another way to approach this issue. The reference committee discussed the resolution in length  
120 and understood the intent of the resolution as forcing hospital systems to take action on a serious  
121 issue or accept potential consequences of lower payment and negative public image. The  
122 reference committee believed the resolved clause referring to physician wellness was too broad.  
123 The AAFP is already working with CMS and other payers to reduce administrative burden and this  
124 is a top priority of the AAFP. The reference committee was not convinced CMS and other payers  
125 should be involved in other aspects of physician wellness outside of administrative burden. In  
126 discussion of the second resolved clause, the reference committee was concerned with negative  
127 impact a performance measure may have on small group practices or independent practices, as  
128 quality measures are often applied across the board and not to just hospital-owned practices,  
129 potential unintended consequences resulting from payment based on wellness, such as suicide or  
130 termination, artificial/dishonest responses, discourage recruitment at low performing practices, or  
131 unwillingness of physicians to disclose status. Public disclosure could exacerbate the negative  
132 impact on physicians. The reference committee chose to recommend the resolution not be  
133 adopted.  
134

135 **RECOMMENDATION: The reference committee recommends that Resolution No. 5004 not**  
136 **be adopted.**

137  
138 **ITEM NO. 5: RESOLUTION NO. 5005: STATE PARITY IN TELEHEALTH AND TELEMEDICINE**  
139

140 RESOLVED, That the American Academy of Family Physicians provide comparative  
141 resources on state reimbursement policies regarding telehealth and telemedicine, and, be it  
142 further  
143

144 RESOLVED, That the American Academy of Family Physicians provide a toolkit on  
145 telehealth and telemedicine (TH/TM) reimbursement, inclusive of model legislation, with  
146 particular attention to the topics of fee-for-service, value based care, parity, and capitation  
147 abilities, in order to empower family physicians to best incorporate TH/TM into their  
148 practices.  
149

150 The reference committee heard testimony in support of the resolution. Testimony reflected that  
151 reimbursement is difficult because it varies from state to state. One member also commented that  
152 there are difficulties with encouraging patients to follow up with their primary care physicians. The  
153 reference committee agreed with the intent of the resolved clauses but did not adopt the resolution.  
154 The reference committee determined the first resolved clause was out of the scope of the AAFP.  
155 The reference committee examined the AAFP's Telemedicine and Telehealth page and  
156 determined the information contained on the page satisfied the second resolved clause.  
157

158 **RECOMMENDATION: The reference committee recommends that Resolution No. 5005 not**  
159 **be adopted.**  
160

161 **ITEM NO. 6: RESOLUTION NO. 5006: PAY US FOR QUALITY MEASURES THAT WE HAVE**  
162 **CONTROL OVER**  
163

164 RESOLVED, That the American Academy of Family Physicians lobby Centers for Medicare  
165 & Medicaid Services to revise the core quality metrics to accept ICD-10 codes that reflect  
166 that the appropriate counseling was performed, a service declined by patient, or the referral  
167 was placed per standard medical guidelines but physician reimbursement is not based on  
168 patient follow-through, and be it further  
169

170 RESOLVED, That the American Academy of Family Physicians lobby Centers for Medicare  
171 & Medicaid Services to create specific ICD-10 codes for refusal of specific preventive  
172 services related to core quality measures and remove patients from the denominator of the  
173 core quality metrics for whom an ICD-10 code has been submitted indicating appropriate  
174 counseling was performed but patient refused service.  
175

176 The reference committee heard testimony in support of the resolution. Testimony included  
177 problems faced by physicians with finding documentation and being paid for care they don't  
178 provide. One person spoke stating that physicians do have some control over certain social  
179 determinants of health that impact quality measures and are able to help patients with things such  
180 as transportation and payment. The reference committee discussed the resolution in depth. There  
181 are no CMS core quality metrics as the first resolved clause incorrectly states. However, the AAFP  
182 does participate in the Core Quality Measures Collaborative and encourages all insurance  
183 companies to adopt these measure sets, and CMS participates in this initiative. The AAFP has two  
184 current policies "Pay-for Performance" and "Physician Profiling" and a position paper "Vision and  
185 Principles of a Quality Measurement Strategy for Primary Care" that specifically address the  
186 resolved clauses. There are CPT II codes available to indicate patient/medical reasons and patient  
187 refusal, but not all measures allow these for exceptions/exclusion. The measure developer  
188 determines the specifications of the measure. The reference committee also pointed out that it is  
189 the duty of family medicine to encourage patients to follow guidelines, and physicians can impact  
190 patient decisions through shared decision-making, so there is some merit to these measures. The  
191 reference committee chose to not adopt the resolution.

239  
240  
241  
242

**RECOMMENDATION: The reference committee recommends that Resolution No. 5006 not be adopted.**

**ITEM NO. 7: RESOLUTION NO. 5007: NON-PHYSICIAN PROVIDER RESOURCE UTILIZATION**

RESOLVED, That the American Academy of Family Physicians will promote and advocate for research and data collection regarding the differences in utilization of ancillary services, including but not limited to emergency department visits, subspecialty referrals, and diagnostic tests, between family medicine physicians and non-physician providers, specifically with regard to management of acute versus chronic disease.

The reference committee heard positive testimony on the resolution. One member stated the issue of non-physician resource utilization needs to be studied so that the data can be used to promote family physicians as a specialty. Another member wanted to use the data to keep states from passing laws allowing mid-levels practice authority. In addition, another member suggested changing “non-physicians” as that language does not capture naturopaths. The reference committee agreed this type of data is valuable to family physicians. However, the reference committee ultimately found evidence-based analysis including meta-analysis regarding the use of ancillary services. The reference committee also determined that new research would require a significant investment from the AAFP. The reference committee recommended to not adopted the resolution.

**RECOMMENDATION: The reference committee recommends that Resolution No. 5007 not be adopted**

**ITEM NO. 8: RESOLUTION NO. 5008: OPPOSITION OF RESTRICTIVE COVENANTS**

RESOLVED, That the American Academy of Family Physicians develop a policy regarding restrictive covenants opposing unreasonable geographic, time or scope of practice constraints protecting the patient-physician relationship, and be it further

RESOLVED, That the American Academy of Family Physicians provide resources and support to members facilitating contract negotiations around restrictive covenants.

Testimony was heard from members who spoke in favor with some suggested edits, specifically to add the word “legal” before support in the second resolved clause, and to further define “unreasonable” to be more specific. Currently, the AMA ethics policy is the AAFP policy <https://www.aafp.org/about/policies/ama-ethics.html>, as stated in AAFP bylaws. This policy encourages physicians from not entering into unreasonable restrictive covenants as quoted in the resolution. The AAFP cannot give legal consult or advice to members. Some chapters have relationships with attorneys, but not all—depending on the chapter. The AAFP currently offers several resources on evaluating employment agreements and negotiating and contracting through *FPM* and *American Family Physician*. The reference committee recommended reaffirming the resolution.

**RECOMMENDATION: The reference committee recommends that Resolution No. 5008 be reaffirmed.**

**ITEM NO. 9: RESOLUTION NO. 5009: AAFP POLICY ON ASSISTANT PHYSICIANS**

243 RESOLVED, That the American Academy of Family Physicians adopt a policy including the  
244 Assistant Physician and Associate Physician that resembles the current policy about non-  
245 physician providers being used in an integrated team based healthcare setting and not  
246 practicing independently, and be it further  
247

248 RESOLVED, That the American Academy of Family Physicians discourage the Assistant  
249 Physician and Associate Physician from using the designation of Family Medicine  
250 Physician, and be it further  
251

252 RESOLVED, That the American Academy of Family Physicians study the current landscape  
253 regarding the process of licensing requirements for these Assistant Physicians and  
254 Associate Physicians and bring back a report to the 2020 Congress of Delegates.  
255

256 The reference committee heard positive testimony on the resolution. One member stated several  
257 states have passed assistant physicians laws and they're concerned they will call themselves  
258 family physicians. Another member stated that it is confusing to have MDs and DOs who don't go  
259 through residency. The reference committee recommended creating an assistant physician policy  
260 to satisfy the first and second resolved clauses that would include language to discourage the use  
261 of family medicine physician among assistant physicians. The reference committee ultimately  
262 recommended reaffirming the third resolved clause as the Congress of Delegates adopted a 2018  
263 resolution that requires the Government Relations Division to create a toolkit on this which  
264 chapters would have access.  
265

266 **RECOMMENDATION: The reference committee recommends that Resolution No. 5009 be**  
267 **adopted.**  
268

269 **ITEM NO. 10: RESOLUTION NO. 5010: EDUCATION FOR COMPLETION OF DISABILITY**  
270 **CERTIFICATIONS**  
271

272 RESOLVED, That the American Academy of Family Physicians provides resources like the  
273 FPM toolbox and practice guidelines regarding disability certification process that broaden  
274 the knowledge of family physicians and help in accurate completion of disability certification  
275 forms, and be it further  
276

277 RESOLVED, That the American Academy of Family Physicians provides an online  
278 database of sample disability certification forms sorted by state.  
279

280 No testimony was heard on the resolution. Family physicians are not trained on how to do disability  
281 forms. The reference committee discussed that occupational health is not available in all areas and  
282 it is difficult to ask patients to pay a lawyer to complete the forms, so family physicians often want  
283 to assist patients with this. The AAFP currently has three resources available for completing  
284 disability claims: the Society of Teachers of Family Medicine's [Completing Disability Forms](#)  
285 [Efficiently and Accurately](#), *American Family Physician's* [Disability Evaluations: More than](#)  
286 [Completing a Form](#), [and Disability Certifications in Adult Workers: A practical approach](#). Providing  
287 and maintaining an online database for all states and updating forms when changes occur is out of  
288 the scope of the AAFP. Chapters may be a more appropriate level for offering a sample of a  
289 completed statewide form. The reference committee discussed whether it may be appropriate to  
290 advocate for a national standard form but was unsure of whom the target of advocacy would be  
291 and whether the AAFP would typically target the agency. The reference committee recommended  
292 adopting a substitute resolution.  
293

294 **RECOMMENDATION: The reference committee recommends that Substitute Resolution No.**  
295 **5010, which reads as follows, be adopted in lieu of Resolution No. 5010:**  
296

297 **RESOLVED, That the American Academy of Family Physicians provide resources like**  
298 **the FPM toolkit and practice guidelines regarding disability certification process that**  
299 **broaden the knowledge of family physicians and help in accurate completion of**  
300 **disability certification forms.**  
301

302 **ITEM NO. 11: RESOLUTION NO. 5011: PRECEPTOR EXPANSION THROUGH FINANCIAL**  
303 **INCENTIVES**  
304

305 RESOLVED, That the American Academy of Family Physicians collect and distribute best  
306 practices in state model legislation to assist with financial incentivization in the expansion of  
307 clinical preceptor opportunities.  
308

309 The reference committee heard testimony in favor of the resolution. Testimony stated PrEP is  
310 preventive care, fairly simple to learn, and should be part of training. The reference committee  
311 discussed there is currently a recommendation to the United States Preventive Services Task  
312 Force to classify PrEP as a Grade A preventive service but a final decision has not yet been made.  
313 All Grade A recommended preventive services are automatically covered by insurance under the  
314 Affordable Care Act (ACA). The reference committee recommended adopting the resolution.  
315

316 **RECOMMENDATION: The reference committee recommends that Resolution No. 5011 be**  
317 **adopted.**  
318

319 **ITEM NO. 12: RESOLUTION NO. 5012: PREVENTION OF HIV ACQUISITION**  
320

321 RESOLVED, That the American Academy of Family Physicians support the use of the  
322 Centers for Disease Control toolkit for family medicine physicians to aid in screening and  
323 prescribing of Pre-exposure Prophylaxis and Post-exposure prophylaxis, and be it further  
324

325 RESOLVED, That the American Academy of Family Physicians (AAFP) support continual  
326 training for practicing family medicine physicians in human immunodeficiency virus pre-  
327 exposure prophylaxis and Post-exposure prophylaxis through development of continuing  
328 medical education as Continuing Medical Education staff determine appropriate for the  
329 greatest exposure to AAFP membership.  
330

331 The reference committee heard testimony in support of the resolution. PrEP is under-prescribed,  
332 within the scope of family medicine, is a preventive service, and should be the responsibility of  
333 family physicians. There are existing AAFP resources with links to the Centers for Disease Control  
334 and Prevention (CDC) toolkit, but the resources are scattered and not easily identified. The topic is  
335 an important issue to address as CME for family medicine. The reference committee  
336 recommended adopting the resolution.  
337

338 **RECOMMENDATION: The reference committee recommends that Resolution No. 5012 be**  
339 **adopted.**  
340

341 **ITEM NO. 13: RESOLUTION NO. 5013: REQUIRED RESIDENCY TRAINING FOR PRE-**  
342 **EXPOSURE AND POST EXPOSURE HIV TREATMENT**  
343

344 RESOLVED, That the American Academy of Family Physicians recommend to the Review  
345 Committee for Family Medicine (RC-FM) pre and post HIV exposure treatment be a  
346 required part of family medicine residency training, and be it further  
347

348 RESOLVED, That the American Academy of Family Physicians support universal insurance  
349 coverage of PrEP and PEP as a preventative care service.  
350

351 The reference committee heard testimony in favor of the resolution. Testimony stated PrEP is  
352 preventive care, fairly simple to learn, and should be part of training. The reference committee  
353 discussed there is currently a recommendation to the United States Preventive Services Task  
354 Force to classify PrEP as a Grade A preventive service but a final decision has not yet been made.  
355 All Grade A recommended preventive services are automatically covered by insurance under the  
356 Affordable Care Act (ACA). The Reference Committee recommended adopting of the resolution.  
357

358 **RECOMMENDATION: The reference committee recommends that Resolution No. 5013 be**  
359 **adopted.**  
360

361 **ITEM NO. 14: RESOLUTION NO. 5014: DEVELOPING POINT OF CARE ULTRASOUND**  
362 **EDUCATION AND RESOURCES FOR PRACTICING FAMILY PHYSICIANS**  
363

364 RESOLVED, That the American Academy of Family Physicians explore opportunities to  
365 partner with organizations such as American Institute of Ultrasound Medicine (AIUM), the  
366 Society for Ultrasound Medical Education (SUSME) and others to produce continuing  
367 medical education targeted to teaching expanded applications of point-of-care ultrasound to  
368 family physicians including conferences, media and webinars, and be it further  
369

370 RESOLVED, That the American Academy of Family Physicians explore opportunities to  
371 create a stand-alone point-of-care ultrasound workshop, including education regarding  
372 reimbursement/billing including demonstrating financial benefit to larger organizations, and  
373 be it further  
374

375 RESOLVED, That the American Academy of Family Physicians work to continue to grow  
376 and develop continuing medical education offerings in the future to help further the  
377 advancement of point of care ultrasound in family medicine, and be it further  
378

379 RESOLVED, That the American Academy of Family Physicians work with the Accreditation  
380 Council for Graduate Medical Education to explore adding point of care ultrasound as a  
381 residency curriculum recommendation.  
382

383 The reference committee heard testimony in favor of the resolution. Testimony stated that Point-of  
384 -Care-Ultrasound (POCUS) is a standard of care and the AAFP has offered some CME, but more  
385 extensive training opportunities are needed. The reference committee agreed with the resolution  
386 and highlighted the high cost of training being offered by other bodies. The committee believed first  
387 and third resolved clauses addressed similar requests and decided to combine the two. The  
388 reference committee recognized that that AAFP has limited ability to influence the ACGME but  
389 asked that the issue still be discussed with ACGME. The reference committee adopted resolved  
390 clauses two four.  
391

392 **RECOMMENDATION: The reference committee recommends that Substitute Resolution No.**  
393 **5014, which reads as follows, be adopted in lieu of Resolution No. 5014:**  
394

395 RESOLVED, That the American Academy of Family Physicians work to continue to  
396 grow and develop point-of-care-ultrasound continuing medical education offerings in  
397 the future, exploring opportunities to partner with organizations such as American  
398 Institute of Ultrasound Medicine and the Society for Ultrasound Medial Education, to  
399 help further the advancement of point-of-care-ultrasound in family medicine.

400  
401  
402 I wish to thank those who appeared before the reference committee to give testimony and  
403 the reference committee members for their invaluable assistance. I also wish to commend  
404 the AAFP staff for their help in the preparation of this report.

405 Respectfully Submitted,

406
