(PBL) Navigating the Complexities of Contraceptive Care

Angeline Ti, MD, MPH
Santina Wheat, MD, MPH, FAAFP

ACTIVITY DISCLAIMER

The material presented here is being made available by the American Academy of Family Physicians for educational purposes only. Please note that medical information is constantly changing; the information contained in this activity was accurate at the time of publication. This material is not intended to represent the only, nor necessarily best, methods or procedures appropriate for the medical situations discussed. Rather, it is intended to present an approach, view, statement, or opinion of the faculty, which may be helpful to others who face similar situations.

The AAFP disclaims any and all liability for injury or other damages resulting to any individual using this material and for all claims that might arise out of the use of the techniques demonstrated therein by such individuals, whether these claims shall be asserted by a physician or any other person. Physicians may care to check specific details such as drug doses and contraindications, etc., in standard sources prior to clinical application. This material might contain recommendations/guidelines developed by other organizations. Please note that although these guidelines might be included, this does not necessarily imply the endorsement by the AAFP.

This live CME session is supported in part by an educational grant from Merck.
DISCLOSURE

It is the policy of the AAFP that all individuals in a position to control content disclose any relationships with commercial interests upon nomination/invitation of participation. Disclosure documents are reviewed for potential conflict of interest (COI), and if identified, conflicts are resolved prior to confirmation of participation. Only those participants who had no conflict of interest or who agreed to an identified resolution process prior to their participation were involved in this CME activity.

All individuals in a position to control content for this session have indicated they have no relevant financial relationships to disclose.

The content of my material/presentation in this CME activity will include discussion of unapproved or investigational uses of products or devices as indicated: Discussion of evidenced-based but off-label uses of certain contraceptive methods.

Angeline Ti, MD, MPH

Assistant Professor, Department of Gynecology and Obstetrics, Department of Family and Preventive Medicine, Emory University School of Medicine, Atlanta, Georgia

Dr. Ti earned her Master of Public Health from Johns Hopkins Bloomberg School of Public Health, and is a graduate of the University of Michigan Medical School in Ann Arbor, Michigan. She completed her residency in Family and Community Medicine and a fellowship in Family Planning at the University of California, San Francisco, conducting research on the family planning values and preferences of incarcerated girls. Dr. Ti also completed a 2-year research position in the Division of Reproductive Health at the Centers for Disease Control and Prevention (CDC), working on the CDC contraception guidance. She is now faculty in the Division of Family Planning, and is the medical director of the Title X clinic at Grady Memorial Hospital. She currently provides primary care, transgender care, and family planning care. She also serves on the Georgia AFP Public Health Committee and the Georgia Department of Public Health Maternal Mortality Review Committee Action Committee.
Santina Wheat, MD, MPH, FAAFP

Assistant Professor, Department of Family and Community Medicine, Northwestern University Feinberg School of Medicine, Chicago, Illinois; Program Director, Northwestern McGaw Family Medicine Residency at Humboldt Park, Chicago, Illinois; Physician, Erie Family Health Centers, Chicago, Illinois

Dr. Wheat earned her medical degree from the University of Illinois College of Medicine at Chicago, and she earned her Master of Public Health (MPH) degree at the University of Illinois at Chicago School of Public Health. She completed a residency in family medicine at Northwestern McGaw Family Medicine Residency at Humboldt Park in Chicago, Illinois. Dr. Wheat has a strong interest in reproductive health and social determinants of health, and she works with a largely Spanish-speaking patient population at a federally qualified health center (FQHC) in Chicago. She provides full primary care to patients living with HIV/AIDS and hepatitis C. Dr. Wheat is the program director for the Northwestern McGaw Family Medicine Residency. She runs an outpatient procedure clinic with the residents in her program and is part of the maternity care team.

Learning Objectives

1. Practice applying new knowledge and skills gained from Navigating the Complexities of Contraceptive Care sessions, through collaborative learning with peers and expert faculty.

2. Identify strategies that foster optimal management of contraceptive care, within the context of professional practice.

3. Formulate an action plan to implement practice changes, aimed at improving patient care.
Associated Sessions

• Navigating the Complexities of Contraceptive Care

Screening for pregnancy intention

• One Key Question

• Intention-oriented vs service-oriented
  – “Do you want to get pregnant soon?”
  – “Can we help you today with birth control or pregnancy planning?”

“Power to Decide, One Key Question”: https://powertodecide.org/one-key-question

Let’s practice!

• Provider: You are seeing a new patient for an annual exam.
  - Screen your patient for pregnancy intention

• Patient: You are a 32 year old G2P2 with no significant past medical history

Let’s practice!

• Provider: You are seeing a patient for a routine follow-up visit to discuss diabetes.
  - Screen your patient for pregnancy intention and briefly discuss contraception or pre-pregnancy planning

• Patient: You are a 38 year old G0 with diabetes. Your recent HgA1c was 9.5.
Let’s practice!

- Provider: You are seeing a patient for an urgent care visit visit
  - Screen your patient for pregnancy intention and discuss pregnancy risk

- Patient: You are a 26 year old G1P0 with symptoms of a urinary tract infection.

Debrief

- What worked? What didn’t work?

- Any “ah ha” moments?

- How can this work in your practice?
Shared decision-making

- Patient values, preferences, and situation
- Medical evidence, risks and benefits

Individualized decision

Let’s practice!

- 19 year old G1P1 interested in contraception.
  - Elicit patient preferences and needs
  - Personalize counseling on methods related to patient preferences
  - Interactively establish a plan
Let’s practice!

• 28 year old G0 who is 4 weeks post-bariatric surgery. Hopes that weight loss will help her fertility and desires pregnancy ASAP.
  - Elicit patient preferences
  - Personalize counseling on risks and benefits
  - Interactively establish a plan

Let’s practice!

• 37 year old P3 with hypertension. Blood pressure today 145/85. Wants to re-start combined oral contraceptives (COCs) (MEC 3).
  - Elicit patient preferences
  - Personalize counseling on risks and benefits
  - Interactively establish a plan
Debrief

• What worked? What didn’t work?

• Any “ah ha” moments?

• How can this work in your practice?

US MEC

Let’s practice!

- 24 year old presents requesting COCs. She has lupus that has been uncomplicated without any recent flares and also has migraines without aura that are well controlled with a triptan.

- Do you feel comfortable prescribing COCs?

Assessing risk of multiple conditions

- Migraines without aura and SLE
Let’s practice!

- 35 year old presents requesting DMPA. She has well-controlled hypertension on a regimen of lisinopril/hydrochlorothiazide and has a partner who is HIV+ and not taking medication

- Do you feel comfortable prescribing DMPA?

Assessing risk of multiple conditions

- Controlled HTN and high risk for HIV
Let’s practice!

• 30 year old G0 presents requesting a copper IUD. She has sickle cell anemia and a history of PID 4 years ago.

• Would you feel comfortable placing a copper IUD?

Assessing risk of multiple conditions

• Sickle cell anemia and history of PID
Contraceptive management

- Emergency contraception
- Starting methods

Let’s practice!

- COCs: LMP 4 days ago, last sex 3 days ago, uses condoms 100% of the time
  - Can you rule out pregnancy?
  - Can method start today?
  - Should you offer EC?
    - If yes, can your patient still start their method today?
Contraceptive management

- COCs: LMP 4 days ago, last sex 3 days ago, uses condoms 100% of the time
  - Can rule out pregnancy
    - May consider effectiveness of condoms
  - Can start method today
  - EC generally not necessary
    - If offer EC, need to wait 5 days to start COCs if using UPA

Let’s practice!

- DMPA: LMP 3 weeks ago, last unprotected sex yesterday
  - Can you rule out pregnancy?
  - Can method start today?
  - Should you offer EC?
    - If yes, can your patient still start their method today?
Contraceptive management

• DMPA: LMP 3 weeks ago, last unprotected sex yesterday
  – Cannot rule out pregnancy
  – Can still start method today
  – EC would be a great idea
    • If offer EC, need to wait 5 days to start DMPA if using UPA

Let’s practice!

• Cu-IUD: LMP 2 weeks ago, last unprotected sex 4 days ago
  – Can you rule out pregnancy?
  – Can method start today?
  – Should you offer EC?
    • If yes, can your patient still start their method today?
Contraceptive management

• Cu-IUD: LMP 2 weeks ago, last unprotected sex 4 days ago
  – Cannot rule out pregnancy
  – Can still start method today…
  – A Cu-IUD 4 days after unprotected sex is EC!
