July 30, 2018

Dear AAFP NRN Member:

We are writing to invite you to participate in a federally funded, national research study on obesity treatment in primary care. Your practice is uniquely important to this study because the Medicare database identifies that your practice has provided Intensive Behavioral Therapy (IBT) for obesity services, while most practices have not. We want to learn from you!

We hope you will participate. Here is what is involved.

- Please read the enclosed "Post Card Consent."
- If you decide to participate, then please complete the attached "Obesity Use in Primary Care Written Questionnaire." You may also complete the survey online instead. Go to bit.ly/2CSN2fx
- It takes 10-30 minutes to complete the questionnaire. Please use estimates rather than spend a lot of time.
- Return the completed questionnaire in the enclosed self-addressed stamped envelope. You also may fax it directly to Lauri Connelly at 303-724-9497 or email it to her at lauri.connelly@ucdenver.edu.
- **We will pay you (or your practice) with a \$50 gift card to Target or Starbucks (your choice) for completing/returning the survey.**

Attached is the MOST Study brochure with additional information about the study. If you would like more information or have any questions regarding the study or would like to opt out of the study (decline participation), then please contact Lauri Connelly, Professional Research Assistant at 303-724-9529 or by email at lauri.connelly@ucdenver.edu. Thank you for your consideration and best wishes.

Sincerely,

Jodi Summers Holtrop, PhD
