

The American Academy of Family Physicians Foundation advances the values of Family Medicine through humanitarian, educational, and scientific philanthropy dedicated to improving health.

American Academy of Family Physicians Foundation *Family Medicine Cares USA (FMC USA)*, one of the Foundation's humanitarian programs, supports free health clinics, both new and existing, by providing grant money up to \$25,000 for the start-up of new free health clinics and up to \$10,000 for existing health clinics for the purchase of tangible items such as exam tables, computers for EHR systems, and medical equipment. *FMC USA* collaborates with the non-profit organization, Volunteers in Medicine (VIM). VIM is the only national organization with a successful track record of developing sustainable, locally-supported free clinics in underserved communities throughout the United States.

FMC USA has one grant cycle each year. Applications are due July 15. The program also provides opportunities for retired and active physicians, residents, and medical students to volunteer their time and talents at the clinics. Visit the AAFP Foundation website for grant details and requirements on how you can apply For a *FMC USA* free clinic grant at aafpfoundation.org/fmcusa

Total *FMC USA* Grant Dollars Awarded to Date: \$490,828

Cumulatively, the *Family Medicine Cares USA* grant award clinics have provided a value of services totaling more than \$53 million; a result of over 268,000 patient visits.
