

CHECKLIST: EMERGENCY SUPPLIES FOR FAMILY MEDICINE OFFICES

The following checklist of recommended emergency supplies includes many expected items as well as several items less commonly found in family medicine offices. In deciding whether to include a particular item in your practice, consider your staff members' ability to use the item appropriately and your office's access and proximity to emergency services.

Equipment
<input type="checkbox"/> Automated external defibrillator (AED)
<input type="checkbox"/> Bag mask ventilator (two bag sizes and three mask sizes for adult, pediatric, and infant)
<input type="checkbox"/> Blood pressure cuff (all sizes)
