Note: Codes that include NOS (not otherwise specified) or unsp. (unspecified) have alternative diagnosis codes that are more specific. These alternatives can be found in or near the section of ICD-9-CM that deals with the relevant three-digit codes. The 100 codes that are preceded by an arrow (➤) have been identified by the authors as especially common in family medicine.

This list reflects changes that took effect Oct. 1, 2011. For more information about this year's ICD-9 changes, see "One Last Annual ICD-9 Update." Hughes C. *Family Practice Management*. September/October 2011;24. <http://www.aafp.org/fpm/2011/0900/p24.html>.
